In claim 1, line 14 "frying claw" is incorrect. Reference numeral 20 found on page 1, line 10 is not found in the drawing. Drawing Figure 2 shows two different elements having reference numeral 22. Correction of the above and all similar matters is required.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 14 there is no proper antecedent basis for the "head body". In claim 1, line 17 there is no proper antecedent basis for the "claw body". The lack of proper antecedent basis for these terms renders the claims indeterminate of scope.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Mitchell et al.

Mitchell et al shows a spring tool having a grip 30, a head 32, and a claw 33. On the claw is a lateral engaging groove 38,39 at an intermediate portion of the claw. The front or upper surface of the claw 33 as shown in Figure 6 has a semi-circular push groove. Statements of intended use have not been accorded any patentable significance. In any case, the Mitchell et al tool is seen to be capable of performing the

recited intended use since it has all the same structure recited in the claims and since clutches and their springs are available in a wide range of sizes.
